Map Showing Underground Coal Mines in Clay County, Indiana

**Explanation**
- Undeveloped Subsurface Area
- Area of Coal Seam Extent
- Bottomcoal
- Crinoidal Sandstone
- Mudstone
- Poring Sandstone
- Marine
- Upper Coal Seam
- Upper Coal Seam
- Lower Coal Seam
- Lower Coal Seam
- Uplifted

**Mine Type**
- Mine Shaft
- Antooper Shaft
- Strip or Creek
- Uplifted

**Mine Identification Number**
- Back to Coal Survey

**Map Description**
This map shows the locations of underground coal mines in Clay County, Indiana. The information is updated annually from archived geologic reports, geologists' field notes, and several series of published maps. Updated mine maps are collected annually from the Head, Coal and Industrial Minerals Section, of the Indiana Department of Natural Resources (IDNR). However, a margin of error is believed to be present in the map data; therefore, the map is intended to show the limits or jurisdiction of any federal, state or local authority without warranty. The Indiana Department of Natural Resources makes no representation as to the accuracy of the information included in this map. The information is intended to show the locations of underground coal mines and to support land use planning and regulatory activities. The information is verified through the U.S. Geological Survey, Indiana University, and the Indiana Department of Natural Resources, and is compiled through the Indiana Coal and Industrial Minerals Section, and the General Land Office. The information is verified through the U.S. Geological Survey, Indiana University, and the Indiana Department of Natural Resources, and is compiled through the Indiana Coal and Industrial Minerals Section, and the General Land Office.

**Additional Information**
All mine data shown on this map are compiled in a Geographic Information System (GIS) using data from the General Land Office and the U.S. Geological Survey. Other mined areas shown on the map were compiled from information collected by the Head, Coal and Industrial Minerals Section, of the Indiana Department of Natural Resources. The information is intended to show the locations of underground coal mines and to support land use planning and regulatory activities. The information is verified through the U.S. Geological Survey, Indiana University, and the Indiana Department of Natural Resources, and is compiled through the Indiana Coal and Industrial Minerals Section, and the General Land Office. The information is verified through the U.S. Geological Survey, Indiana University, and the Indiana Department of Natural Resources, and is compiled through the Indiana Coal and Industrial Minerals Section, and the General Land Office.

**Data Availability**
This map may be available for purchase through the Indiana Department of Natural Resources, Indiana University, and the U.S. Geological Survey. For more information, contact the Indiana Department of Natural Resources, Indiana University, or the U.S. Geological Survey.
