Map Showing Surface Coal Mines in Martin County, Indiana

Explanation
- Surface Mine
- Mine Identification Number

Map Description
This map shows the location and extent of surface coal mines in Martin County, Indiana. The map is intended for use by the public, researchers, and government agencies to locate and study surface mines. All data was digitized from 1:24,000 scale USGS topographic quadrangle maps.

Additional Information
Surface mine data on the map were compiled from various sources, including archived geologic reports, geologists' field notes, Division of Reclamation maps, Annual State Geological Reports, mining company records, and several series of published maps. The map is intended for use in the study and understanding of surface coal mining in Martin County.
