Explore 3-D models of fossils from the Indiana University Paleontology Collection using augmented reality (AR). With our Fossil CalendAR app, you can hold fossils in your hand and learn more about the inhabitants of ancient Indiana in three distinct periods: the Paleozoic Era, when Indiana was covered by a warm shallow ocean; the Pennsylvanian Period with its lush tropical forests; and the Pleistocene Epoch, when large mammals roamed the ice margins of glaciers. (The scale bars next to each specimen are 1 centimeter.)

This poster is an augmented reality experience. Download the Fossil CalendAR app and explore more on your smart device.
